COMBINE & REFINES

Categorise by state, species

common species

CATEGORISE

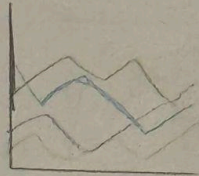

- Geographic - Which state has most
- Time based - Growth of species pop
- Categorical - Endangered or not
- Comparative - Different species

QUESTION

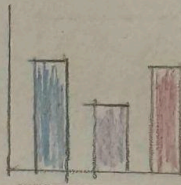

- Does it show any patterns?
- Has some species declined/increased over the last few years?
- Which species is at risk of endangerment?
- Which state is more abundant in wildlife?

LAYOUT

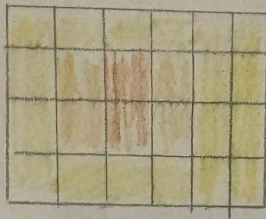

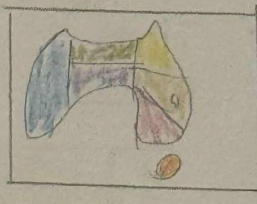

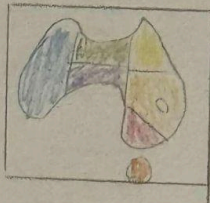

Australian Biodiversity

Sheet 2

Tasa DV A2

OPERATIONS

Graphs with maps
linked below

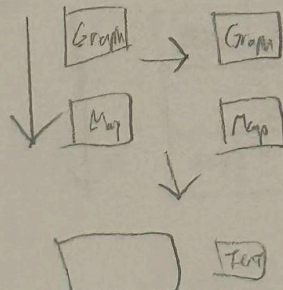

Heatmap to show
index

Maps showing
different data

FOCUS

- Dual sided graphs

• Show multiple data in quick succession

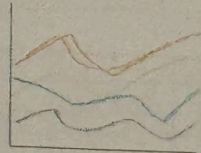

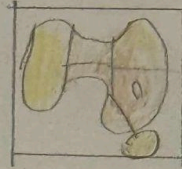

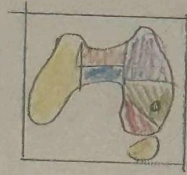

DISCUSSION

- Too much at the start
- Improper order of graphs
- Change graph sizes

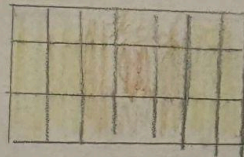

LAYOUT

Biodiversity in Australia

Sheet 3

Tasa DV A 2

OPERATIONS

2 Maps to show different data

Follow up graphs to build upon

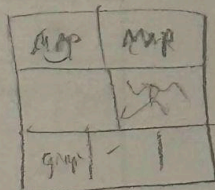

Heatmap to show animal index

Area graph for population growth

FOCUS

Main Focus on 2 Maps

- Using other graphs to further tell a story

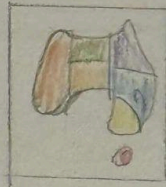

DISCUSSION

- Can overwhelm at the start
- Could rearrange graphs
- Add interaction

Sheet 4

Task WA2

OPERATIONS

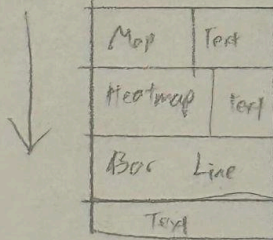

Map - To show initial context

Heatmap - To see species endangerment

Barline graph - To compare different species

FOCUS

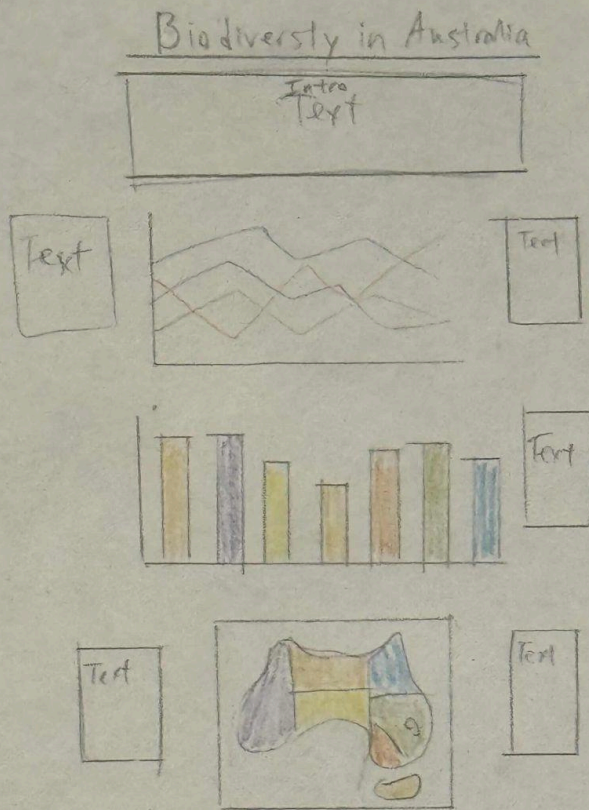

- No main context
- A start beginning from top to bottom

DISCUSSION

- Can the order be changed?
- Can I show more with little
- Add interaction

Map graph

FOCUS

Main focus would be the initial graphs

- Let's readers understand the development of Australian biodiversity
- Gives context for the next graph and so on

DETAIL

- Cleaning Data
- Creating an eye catching page
- Estimates
 - 1 day for map
 - 3 days for other graphs
 - 2 days for
- dashboard page
- Specific Requirements
 - Vegalite proficiency
 - HTML page styling
